

It is becoming very sad in this country. I'm starting to feel that I can not trust our government to do the right thing any longer. It's all about money? money to get elected, money to stay in office and money to turn decisions in favor of the big companies and groups. Name one good reason why Medicare can't negotiate drug prices. Well, that is another story. Although I don't use Traffic and Weather from my XM receiver, I do support the right to broadcast it and have fair competition. Please reject the NAB's petition 04-160.

Also, is there any good reason why I can not get the news from out of market local channels on my satellite TV? We have the technology and our government says we can't use it, even if we are willing to pay more to get the feeds.

Who's paying off whom this time around?
